

SEED ROUND

PRIVACY-FIRST CONSUMER SOFTWARE

APRIL 2026

Meerkat

39 modules. 5 workflow loops. One private hub. \$12 a year. Local-first software that replaces the entire stack of personal apps people already pay for. Meerkat consolidates Strava, MyFitnessPal, AllTrails, YNAB, Flo, Day One, Rocket Money and 110 others into five intelligent workflow loops that share one database, one subscription, and zero ads. Data syncs phone-to-phone over Wi-Fi, LAN, and Bluetooth before it ever touches a server.

iOS · Android · Web Shipping since 2025 trey.shuldberg@gmail.com

The competitive universe

117 COMPETITORS · ONE APP REPLACES THEM ALL

Every logo below is a standalone app charging \$35 to \$120 per year. Meerkat replaces them all for \$12. The globe represents the fragmented personal-app economy; Meerkat is the center of gravity.

117 competitors mapped across 29 categories. Combined revenue exceeds \$4.5B annually. Combined addressable users: 876M MAU (657M overlap-adjusted).

The idea

39 MODULES · 5 WORKFLOW LOOPS · 1 SUBSCRIPTION

5 workflow loops, not 39 apps

Every module connects into one of five intelligent loops: Health & Fitness, Home & Life, Mind & Growth, Social & Community, and Money & Planning. Data flows across modules within each loop, creating insights no single-purpose app can produce.

Local-first. Zero analytics. Zero ads.

All data lives in one encrypted SQLite file on-device. No third-party SDKs, no crash reporters, no ad networks. Opt-in cloud only. Published anti-enshittification pledge signed in code.

Cross-module intelligence is the moat

Workouts, mood, cycle, nutrition, and sleep share one database. Patterns across categories are trivial for Meerkat and structurally impossible for 39 single-purpose apps or any acquisition rollup.

Five workflow loops

39 MODULES CONSOLIDATED INTO 5 INTELLIGENT SYSTEMS

Users do not think in modules. They think in flows: "I want to get fit," "I want to manage my home," "I want to grow." Meerkat organizes 39 modules into five loops that mirror how people actually live.

Health & Fitness

Full-stack body intelligence: what you eat, how you move, how you recover, how you sleep. Every module feeds the next.

Phased rollout

CRAWL · WALK · RUN · FLY

PHASE 1

Foundation

Hub shell, core modules (Budget, Journal, Notes, Mood, Fast), SQLite engine, design system. iOS + Web.

Shipped Q1 2026

PHASE 2

Workflow Loops

All 39 modules wired. Five workflow loops active. Cross-module intelligence engine. Android launch.

Q2-Q3 2026

PHASE 3

Mesh Sync

Decentralized sync: LAN, Multipeer, BLE, WebRTC, encrypted relay. Family and group sharing without servers.

Q4 2026

PHASE 4

Scale

50-city viral marketing launch. Community features. Theme marketplace. macOS native. Enterprise wellness tier.

2027

The gap in the market

WHY NO ONE HAS BUILT THIS

Privacy failure is now priced in

Flo Health settled with the FTC after sharing menstrual data with Facebook and Google. Strava's heatmap exposed military bases. Life360 sold precise location data to the Arity ad broker. Users are pricing in the risk and regulators are catching up.

The stack costs \$500+ /yr

Strava (\$80) + MyFitnessPal (\$80) + YNAB (\$109) + Flo (\$50) + Calm (\$70) + AllTrails (\$36) + Day One (\$35) + Quizlet (\$48) cost \$508/yr stacked. Every incumbent is single-category by construction. That bundling gap is Meerkat.

Cross-module intelligence is structural

Workouts correlate with mood. Cycle correlates with sleep. Nutrition correlates with energy. On stacked single-purpose apps these insights are impossible. On one database they are trivial. No competitor can replicate this without merging with 38 others.

Anti-enshittification as a brand

Meerkat ships a signed pledge: no ads, no telemetry, no training AI on your data, no feature paywall downgrades. Enforced in code, not marketing. Direct counter to the Bending Spoons / Rocket Money / Voodoo rollup pattern that is extracting this category.

Deep dive: Health & Fitness loop

THE FLAGSHIP WORKFLOW · 9 MODULES · \$1.8B+ IN COMPETITOR REVENUE

This is one workflow loop that replaces 9 standalone subscriptions. A user cooks dinner (Recipes), logs macros automatically (Nutrition), hits the gym knowing their fuel state (Workouts), tracks recovery and vitals (Health), hikes a trail on the weekend (Trails), surfs on Sunday (Surf), budgets the grocery and gear spend (Budget), and sleeps with full-day context (Sleep). Every module feeds the next. No single-purpose app can do this.

COMPETITOR	MEERKAT MODULE	PRICE/YR	REVENUE	USERS
Strava	Trails + Workouts	\$79.99	\$415M	135M reg / 4M paid
MyFitnessPal	Nutrition	\$79.99	\$310M	220M reg / 30M MAU
Headspace	Health (Mind)	\$69.99	\$348M	100M dl / 2.8M paid
Calm	Sleep + Health	\$69.99	\$100M+	140M dl / 3.5M paid
Flo Health	Health (Cycle)	\$49.99	\$275M	77M active / 5.5M paid
Surpline	Surf	\$99.99	~\$40M	10M monthly visits
AllTrails	Trails	\$35.99	\$38M	60M users / 1.8M paid
YNAB	Budget	\$109	~\$100M	~2M subs
Hevy	Workouts	\$39.99	~\$7M	10M users
Sleep Cycle	Sleep	\$39.99	~\$35M	3M paid
Paprika	Recipes	\$4.99	~\$360K	44K+ ratings
Cronometer	Nutrition	\$49.99	~\$3.8M	3.5M reg
Loop total		\$729/yr stacked	\$1.67B+	Combined
Meerkat (all of the above)		\$12	-	-

A user currently paying for Strava + MyFitnessPal + AllTrails + YNAB alone spends \$305/yr. Meerkat replaces all four (and 8 more) for \$12. The revenue figures above represent the total market these competitors have validated.

How the loop works

1. Cook & Log

Plan meals in Recipes. Macros flow automatically into Nutrition. Grocery list syncs to Budget.

2. Move & Track

Workouts knows your protein and calorie state from Nutrition. Trail hikes and surf sessions log GPS, elevation, and energy burn.

3. Recover & Reflect

Health aggregates everything: sleep quality, HRV, activity rings, medication adherence, cycle phase. Budget tracks the cost of all of it.

Why this loop is a \$1.8B+ market

VALIDATED DEMAND ACROSS EVERY MODULE

VALIDATED EXITS IN THIS LOOP

COMPANY	PRICE	YEAR
Headspace + Ginger	\$3.0B	2022
Rocket Money	\$1.275B	2021
AllTrails (Permira)	~\$1.0B	2018+
MyFitnessPal	\$345M	2020
Komoot (Bending Spoons)	~\$330M	2025

\$5.95B in exit value from companies that cover only 1-2 of the 9 modules in this single loop.

COMBINED USER POOL

560M+ registered users across loop competitors

Strava (135M) + MyFitnessPal (220M) + Flo (77M) + Calm (140M) + AllTrails (60M) + Hevy (10M) = 642M registered. Even with aggressive 30% overlap deduction, this loop alone addresses 450M+ unique users.

These users are already paying for fragmented single-purpose apps. The conversion ask is not "try something new" but "pay less for more."

Your data stays yours

THE PRIVACY AND COST ADVANTAGE

No servers required

Your phone talks directly to your other devices over Wi-Fi, Bluetooth, or the internet. Meerkat never stores your data on our servers. This is how iMessage and AirDrop work, applied to your entire personal life.

Share without an account

Families share grocery lists, budgets, and home notes directly between phones. No cloud account, no monthly server bill, no data broker in the middle. Works at a dinner table with the router off.

Near-zero marginal cost

Every competitor runs expensive cloud infrastructure that scales with users. Meerkat runs on the user's own device. More users does not mean more servers. This is why our margins are structurally higher than any competitor.

Decentralized mesh sync is the moat

Every competitor is server-first. Meerkat is phone-first: Wi-Fi, Bluetooth, then internet, then an encrypted-only relay as a last resort. Friends, families, and communities share data without anyone's server in the middle. This architecture is structurally hard for ad-funded and rollup-owned incumbents to ship. It took years to build, and it is the reason our margins are fundamentally different from every company in the competitive globe above.

Ten comparable exits inside our market

MODULE CATEGORIES, VALIDATED

COMPANY	ACQUIRER	YEAR	PRICE	MEERKAT MODULE VALIDATED
Rocket Money (Truebill)	Rocket Companies	2021	\$1.275B	Budget · Subs
Headspace + Ginger	Merger (Blackstone, Spectrum, Cigna)	2022	\$3.0B	Mood
AllTrails	Permira (growth recap)	2018+	~\$1.0B	Trails
BeReal	Voodoo	2024	~\$500M	Friends
Tractive	Bending Spoons	2026 (announced)	EUR 300-500M	Pets
Evernote	Bending Spoons	2022/23	~\$200M est.	Notes
MyFitnessPal	Francisco Partners (from Under Armour)	2020	\$345M	Nutrition
Goodreads	Amazon	2013	~\$150M est.	Books
The Infatuation	JPMorgan Chase	2021	~\$50-80M est.	Dining
Day One	Automattic	2021	~\$20-30M est.	Journal

Every row traces to a competitor file in docs/investor-deck/competitors/ and/or competitor-financials-2024-2026.md. Undisclosed deals are flagged "est."

What competitors charge, who pays

PRICE PER YEAR · PAID SUBSCRIBERS · CATEGORY REVENUE

COMPETITOR	CATEGORY	PRICE / YEAR	PAID SUBS	MAU	REVENUE
Strava	Trails	\$79.99	~3.5M	40M	\$415M
Headspace	Mood	\$69.99	2.8M D2C	-	\$348M
MyFitnessPal	Nutrition	\$79.99	~1M	30M	\$310M
Flo Health	Cycle	\$49.99	~5.5M	70M	\$275M
Calm	Mood / Sleep	\$69.99	3.5M	-	\$100M+
YNAB	Budget	\$109	~2M	paid-only	~\$100M
Quizlet	Flash	\$47.88	~2M est.	60M	\$96M
Rocket Money	Budget / Subs	\$72-168	2M+	-	\$75M
AllTrails	Trails	\$35.99	~1.8M	18M	\$38M
Evernote	Notes	\$130-216	250M+ reg	-	~\$100M
Obsidian	Notes	\$0 / \$48 sync	-	1.5M	\$25M
Monarch Money	Budget	\$99.99	1M+	1.5M	~\$12.6M
Otter.ai	Voice	\$120	est. ~400K	5-8M	\$100M
Clue	Cycle	~\$40	500-800K	-	~\$12M
Hevy	Workouts	~\$40	150-300K	1.5-3M	~\$7M
Finch	Habits	\$39.99	-	-	~\$48M/yr
Day One	Journal	\$34.99	200K+	-	\$7M
Meerkat	All 39 above	\$12	-	-	-

Every competitor row traces to a deep-dive file under docs/investor-deck/competitors/. Paid subscriber counts use company disclosures where available and conservative estimates (flagged "est.") where not. At \$12/yr Meerkat undercuts the cheapest single-category incumbent (Day One at \$34.99) by 65 percent while covering 38 more categories.

Why this will make money

MARKET CAPTURE MODEL · \$12 / YEAR · 5% FREE-TO-PAID

THE ADDRESSABLE POOL

657M users, overlap-adjusted

51 of our 117 tracked competitors publicly disclose MAU. The sum is 876M monthly active users across direct-substitute categories. We haircut 25 percent for the same person using multiple apps, leaving a conservative **657M addressable users**.

Megacorps like Snapchat, Reddit, Discord, and Amazon are excluded; they compete tangentially, not for the personal-app-suite wallet.

THE FUNNEL

Five free modules feed 34 paid

MyFast

MyJournal

MyMood

MyNotes

MyVoice

Each free module is competitive on its own and pulls users into the hub. Voice feeds Journal. Journal feeds Mood. Users upgrade because Meerkat Pro unlocks 34 more modules for less than they currently pay for any one of them.

\$12 / year

\$2 / month

No ads. No data sold.

SCENARIO	CAPTURE OF 657M	TOTAL USERS	PAID SUBS (5%)	ARR @ \$12 / YR
Year 1 (conservative)	0.15%	986K	49.3K	\$592K
Year 2 (plan)	0.50%	3.29M	164.2K	\$1.97M
Year 3 (plan)	1.00%	6.57M	328.5K	\$3.94M
Year 3 (bull)	2.00%	13.1M	657K	\$7.88M

5% free-to-paid matches Flo (~5%), Day One (~6%), Strava (~3-4%), MyFitnessPal (~3-4%), Otter (~5-8%). Billing via RevenueCat on mobile and Stripe on web; net ARPU after app-store fees is ~\$8.40-10.20/yr. With \$1.5M seed and 2x the marketing budget, capture rates step up accordingly. **Path to operational profitability by Year 2** with a lean three-person core team.

THE ASK

\$1.5M

Seed · 10% equity · \$15M pre-money valuation · 24 months of runway

Funds hire a core team, launch a 50-city viral marketing campaign, complete mesh sync, and reach operational profitability. Founder retains 70%+ ownership. Investors receive 10% of the business from a 30% available equity pool.

25%

Founder comp (\$375K / 24 mo)

25%

Sr. engineer hire (\$375K / 24 mo)

20%

Marketing launch (\$300K)

10%

Legal + compliance (\$150K)

7%

Design + contractor (\$100K)

13%

Infra + reserve (\$200K)

Milestones: ~50K paid subs / ~1M total users (year 1), hub NPS above 60, monthly churn under 3%, cross-module activation at least 2.5 modules per user, mesh sync live by Q4 2026.

Investor return model

10% EQUITY · PROFIT SHARING · BUILT TO LAST, NOT TO FLIP

Meerkat is not building to exit. We are building a durable, profitable business that grows organically, expands into new opportunities with its own profits, and pays investors and team well from revenue. Our anti-enshittification pledge means we will never sell to a rollup that strips the product for parts. Your return comes from owning 10% of a company that compounds.

Equity structure

HOLDER	OWNERSHIP
Founder	70%+
Seed investors (this round)	10%
Future rounds / team pool	20%

Founder will not dilute below 70%. The 30% available pool is split: 10% to this seed round (33% of the pool), 20% reserved for future hires, advisors, and follow-on rounds.

Annual profit distribution (10% share)

ANNUAL REVENUE	NET MARGIN	YOUR 10% / YR
\$2M (Year 2 plan)	45%	\$90K / yr
\$4M (Year 3 plan)	55%	\$220K / yr
\$8M (Year 3 bull)	60%	\$480K / yr
\$25M (Year 5 target)	65%	\$1.6M / yr

Local-first architecture means near-zero server costs per user. No cloud infrastructure scaling with growth. Margins widen as revenue grows. At \$25M ARR, your \$1.5M investment returns itself every year, indefinitely.

Why margins are structurally high: Meerkat runs on the user's device. There is no per-user cloud cost, no data warehouse, no ML inference bill, no ad-serving infrastructure. The only recurring costs are a small relay for mesh sync, app store fees (15-30%), and the team. Every category leader we replace (Strava, MFP, Flo, YNAB) runs massive server farms. We do not.
